

Plentli: agentic food rescue for Dubai kitchens

One kitchen message becomes a safe, confirmed delivery. The agent decides; code enforces food safety.

Flow: message → classify → safe window → recipients → dietary check → offers → re-plan on decline → driver → route → safety gate → dispatch → receipt → impact

Infra: CloudFormation (infra/workshop.yaml) + one-command Lambda deploy

Production: me-central-1 (UAE) for data residency
